WEEE REGULATIONS:

On the 2nd January 2007 the Government enacted legislation in line with the Waste Electrical and Electronic Equipment (WEEE) directive from Europe requiring all electrical products to be recycled at the end of their useful life. As a result from the 1st July 2007 all companies involved in commercial catering and refrigeration equipment distribution are responsible for the collection, treatment, recovery and environmentally sound disposal of electrical waste along with the paperwork required to prove compliance.

We will be working in conjunction with our manufacturing and importing suppliers to comply with the WEEE Regulations and will be pleased to quote for the removal of equipment that has reached the end of its useful life only when supplying the replacements.
